

## A Message from TNG

TNG joins organizations and leaders throughout America in condemning the senseless deaths of George Floyd and countless other Black individuals. These are acts fueled by racism and hate. As a firm long-dedicated to the mission of advancing equity, inclusion, and social justice for all persons, TNG supports our brothers, sisters, and otherwise-identified allies who speak out concerning injustice and discrimination. We also hold space to commend the hundreds of thousands of public safety officers who reject division and discrimination and show respect for all people in this country. We all must do more than condemn, and are responsible for elevating dialogue that will empower a reality where hate and violence are replaced with understanding and compassion. The team at TNG is dedicated to helping the education field to take action to bring an end to racial and societal discrimination and inequality.
